

Abhishek Jain

Mobile: 9321148908

Email: abhishekjain1061@gmail.com

Professional Synopsis

- Telecom professional with 18 years of experience in transmission SDH , DWDM, OTN, GPON network integration, fault analysis, fault Troubleshooting, Network Provisioning, Optimization, Capacity Planning, Network up gradation, RPR, Planned Event & related Team management in Nnoc environment.

Organisational Profile

Hcl hcl technologies Pvt. LTD, Noida

Apr '25 to till date

Deputy Manager (Transmission)

Working for Verizon Network with following roles & responsibilities.

Responsibilities:

- Verizon Networks -
 - Working for customers related all type of Work Orders.
 - Working for UK, France, Germany, Italy, Spain and many countries WOs.
 - Working all Install, Change and Disconnect orders within the Verizon Network.
 - Working on Ciena OME 6500, Marconi, Ericsson and Fujitsu SDH & OTN devices.
 - Responsible for E2E circuit provisioning and E2E testing for SDH & OTN network.
 - Circuit provisioning for 10Gbps,1Gbps, VC4 & VC3 capacity bandwidth within SLA.
 - E2E circuit deletion for all capacity bandwidth as per Disconnect order within SLA.
 - Traffic migration for all change orders during Hot cut within maintenance window.
 - Providing support for field activity like E2E testing & Hardware installation in UK.
 - Conducting continuity checks and end-to-end (E2E) testing for all install orders.

Shri Technocrat communications systems PVT. LTD, Mumbai

Sep '24 to Mar '25

Network Planning Manager(Transmission)

Network planning Manager with following roles & responsibilities.

Responsibilities:

- Planning for JIO NLD network upgradation, NLD traffic Migration on Photonic links.
- New photonic link creation, existing Link migration, Channel shifting, traffic rerouting.
- Planning & Plan implementation for 100G, 200G, 500G e2e channel creation & migration.
- Working on Ciena 5400, 1400 & 3200 OTN and DWDM equipment's.
- Working for AMP migration, New Amp addition & Amp provisioning in the NLD network.
- Working on E2E photonic links creation, channel planning & migration.
- MOP creation for new photonics link & photonic link migration.

Domain Support Specialist (Transmission)

Domain support specialist with following roles & responsibilities.

Responsibilities:

- Telstra Group LTD, Australia -
 - Working for Telstra transmission network all fault management.
 - Working on all transmission fault incidence for fault restoration within SLA.
 - Working for Marconi SDH equipment all NAR activities.
 - Hardware replacement on live traffic in day time with redundancy.
 - Planning for service affecting activity in night time in maintenance window.
 - Spare hardware management as per requirement for fault restoration.
 - Support to field engineer for hardware replacement.
 - Creating incidence for any fault.
 - Fiber Plan event activity management during maintenance window.
 - IP, Mobility, access, SDH, DWDM & PDH links status confirmation pre & post activity.
 - Planned event management for SDH & DWDM links.
 -

As Deputy Manager (Network/NOC)

Team lead with following roles & responsibilities.

Responsibilities:

- Gujarat Fibre Grid Network Limited NOC Team -
 - OTN & DWDM Network Fault management Network monitoring & alarm clearance.
 - E2E support for GPON network & network devices (DWDM, L2 Switches, OLT, ONT).
 - 100 Mbps & 1 Gbps testing for all new integrated ONT in GPON network.
 - Configuration & troubleshooting for Optical network terminal (ONT).
 - Network Monitoring & Fault escalation to O&M team.
 - Support to field team for Network integration in field.
 - Fault troubleshooting in network for all GPON network elements.
 - NE addition in EMS, NMS & GIS in GPON NETWORK.
 - Optical loss or fiber cut identification with the help of RFMS.

As Deputy Manager (Network/NOC)

Team member with following roles & responsibilities.

Responsibilities:

- Enterprise team as a team member -
 - Troubleshoot of Ethernet, SDH, DWDM & OTN related enterprise customer's link.
 - Customer links testing from CPE Router.
 - Troubleshooting for customer link fluctuation issue by checking logs in the router.
 - Configurations check in router for customer's down link to resolve issue.
 - Troubleshoot SDH circuits ranging from E1 to STM-64 bandwidth.

- Responsible for troubleshooting & resolving the networks and Enterprise customer's faults within specified time to resolve (TTR).
- Making transport path up by clearing path alarms like RS-LOS, MS-AIS, MS-RDI, RS-LOF, RS-TIM, TU-AIS, TU-LOP, LP-PLM etc.
- To co-ordinate with different groups in the NNOC such as Switch, DCN, OSP to minimize service disruption.

Reliance communications Infrastructure LTD, Mumbai

Oct '17 to Oct '18

As Deputy Manager (Network/NOC)

Team member with following roles & responsibilities.

Responsibilities:

- To maintain fault records in OSS.
- Alarm monitoring & troubleshooting faults through NMS.
- Managing the process linked with provisioning, of E1, Loop verification.
- Answerable for Testing of end-to-end transport circuit.
- Interacting with field engineers on solutions to troubleshoot and repair complex circuits, hardware faults and PDH faults.
- Fault Management and updating database in clarity
- To co-ordinate with field engineers on solutions to equipment configuration, hardware faults
- Fault management and resolution and Escalations of faults to concerned departments.
- Accountable for operational effectiveness of Core Data Networks & resolving Enterprise customer problem for DIA & VPN services with KRA as low MTTR/Downtime.
- Primary performance and analysis of Data network.

Ericsson India Pvt. LTD, Mumbai

Jan '15 to Oct'17

As Senior Engineer

Network planning, provisioning and fault management.

Responsibilities:

- Provisioning of Ethernet circuits & OTN links with different bandwidth (VC3, VC4).
- Provisioning & troubleshooting of various L2VPN, L3VPN and DIA links.
- Providing protection path for VC12, VC3 and VC4 label circuits as per raised FT in NNOC .
- Efficiently Planning & Provisioning of Optical Transport circuits (E1s, DS3, STM1) on SDH ring and providing services like for Leased Lines, VPNs, PRI, and DIA to customers in all vender equipment.
- Modification and De-provisioning of E1s and KLM Repacking.
- Bandwidth Up gradation for Customer links during the maintenance window.
- Troubleshooting and fault rectification of link on the basis of customer complain.

Esjay Ericsson India Pvt. LTD, Mumbai

Dec '14 to Dec'14

As Senior Engineer

Network planning, provisioning and fault management.

Responsibilities:

- Planning of planned events (PE) for shifting traffic on optical/electrical channel, ring shifting and splitting activities.
- Troubleshooting transport faults using alarms and coordinating with Field & TACNOC for clearance of FT.

Alcatel-Lucent Managed Solutions India Private Limited, Mumbai April 13 to Nov 2014

As Provisioning Engineer team Member

- Providing protection path for VC12, VC3 and VC4 label circuits as per raised FT in NNOC .
- Efficiently Planning & Provisioning of Optical Transport circuits (E1s, DS3, STM1) on SDH ring and providing services like for Leased Lines, VPNs, PRI, and DIA to customers in all vendor equipment.
- Modification and De-provisioning of E1s and KLM Repacking.
- Bandwidth Up gradation for Customer links during the maintenance window.
- Troubleshooting and fault rectification of link on the basis of customer complain.
- Planning of planned events (PE) for shifting traffic on optical/electrical channel, ring shifting and splitting activities.
- Troubleshooting transport faults using alarms and coordinating with Field & TACNOC for clearance of FT.

Raliance Integrated Service Pvt LTD, Mumbai

Mar 10 to Mar 2013

As Optimization Engineer team Member

- Optimization in Transport Network to remove Capacity Constraints by Strategy Planning & Implementations based on Business Requirement.
- Working as a Part Change Request team which Involves Scheduling of Plan Event Activities in Maintenance Window, Co ordination with Field & Planning Team, Sending Notification to Carrier Customer.
- Creating and Routing Bandwidths of Different Capacities through Repacking.
- Auditing Critical links in Network in order to avoid any Major Outage.
- Troubleshooting Bulk Provisioning / Deleting / Modify of the circuits in range 1000-4000 circuits PE maintenance window.
- Migrating the Traffic from Nortel STM-16 to OME N65/New Marconi rings/DWDM Rings in PAN India.
- Ring splitting to create capacity & VC-12 & VC4 repacking to create capacity without any hardware requirements.
- Ring Up gradation i.e. STM1 to STM4, STM4 to STM16, STM16 to STM 64.
- Removing Unused cross connects present in the Networks.
- Planning and Provisioning of Enterprise Customer & Network Links over SDH Equipments.

Eagle Photonics Pvt Ltd, Bangalore

April 2007 to Mar 2010

As Executive Engineer Team lead

- Technical support in Deployment of Nortel DWDM & OTN based equipment - OME 6500/OM 5200 DWDM /Common Photonics Layer DWDM system for Nortel in Reliance communications Network.
- NNOC Acceptance Test of all Nortel DWDM & OTN based equipments- OME 6500(10G), OME 6500 Broadband(10G),OM 5200(DWDM & Common Photonic Layer systems & integration through NMS in the Networks.

- Implementation of CPL & OME 6500BB on Field Supporting the field Personnel for configuration Issues. Vendor Team management for the Installation, Commissioning & Acceptance Testing of the same (End to End Testing).
- Alarm monitoring and fault rectification of the Transmission Network (for Nortel equipments) and detecting faults.

Responsibilities:

- Responsible for assigning and distribution of work load among the team members and achieving optimum output.
- Responsible for network monitoring and fault management, in SDH Transport Network.
- Ensuring that all customer and network faults are repaired within the Service Level Agreements (SLA's).

Technical Skills

- CCNA certified.
- Hands on experience on Cisco router & switches.
- Knowledge of OSPF, EIGRP & BGP routing protocols.
- Experience on OTN & DWDM Equipment– OME6500 Broadband (10G), OM5200& CPL.
- Hands on Experience on Tejas & DLink Switches (DGS-1210-12TS & DGS-3000-10L GE switch).
- Experience on Nortel Equipment - OME 6500(10G), TN16XE, TN- 4XE, TN-1C, TN-1X& OME.
- Experience on Marconi Equipment - MV 36/38, 1600/1684/OMS 1634.
- Experience on Fibcom Equipment - FIBCOMM equipment's F21, F24, F26, F36.
- Telecom Aspect - SDH, OTN, DWDM, ROADM, NMS/EMS/server/DCN management.
- Experienced in maintaining fault records in Operations Support Systems (Clarity OSS).

Academia

- **Master of Science(Electronics):** First class from Dr.H.S.Gour Uni. Sagar (M.P), (Year 2005).
- **CCNA (Routing & Switching)** certified.
- **Certificate course in Embedded system design** from Pune University, (Year 2006)

Personal Details

Father's Name	:	Sh. Kapoorchand Jain
Date of Birth	:	25th Sep, 1982.
Languages	:	English, Hindi.
Marital Status	:	Married.
Passport Number	:	G8771783.
Permanent Address	:	N H.N-135,Near Jain Temple,Tendukhrda,Narsinghpur(M.P)

Place: Mumbai

Abhishek Jain.
