

Sumeet Ahire

Data scientist

Data Scientist with expertise in data preprocessing, exploratory data analysis (EDA), and predictive modeling. Adept at using Python, SQL, machine learning techniques to extract actionable insights. Specialized experience in insurance data analytics and calculation engines.

Address

Bhimnagar, Behind sarodaya
Hospital, Ghatkopar-Wese,
Mumbai-400086

Education

2020

B.E. Electronic

Mumbai University-Vidyalankar institute
of technology

2017

Diploma In Eletronics

Vivekanand education society

Skills

- Machine Learning
- Python Programming
- My SQL
- Data Visualisation
- Power BI
- Excel

Experience

Nov-23 - Present

Valuenable Pvt.Ltd

Data Analyst

- Collaborated with cross-functional teams to identify key analytical requirements in insurance products.
- Created an Excel-based calculation engine that utilized advanced functions to determine premiums and policy specifics.
- Integrated Excel with Python to facilitate data-driven decision-making.
- Designed and implemented machine learning models to extract insights from client data, leading to actionable recommendations for optimizing efficiency and resource distribution.
- Assessed and enhanced existing machine learning models, consistently improving their performance and accuracy through iterative adjustments.
- Took a crucial role in documenting the functionality and application of the ML model predictions, offering thorough training to team members and users to ensure effective tool usage.

Mar-2022 - Nov -2023

Reliance Jio Info Limited

Responsible for field operations and maintenance of FTTx network

Projects

ML Model for Combined-Cycle Power Plant

<https://drive.google.com/drive/folders/1RsWbvfrp8Xr84nNrBf8lcmKCtMj3hXsy>

- Created a predictive model in Python to enhance energy production efficiency based on factors like exhaust vacuum, temperature, pressure, and humidity.

Data Extraction and NLP

https://drive.google.com/drive/folders/1E1azOtYI_NWhbQ_I3YLeu13ouyQV_hs7

- Developed a Python-based solution for text analysis using Natural Language Processing (NLP) from various URLs.

Certifications

Data Science-Excelr Solution

- Learned Machine Learning algorithms including Linear Regression, KNN, SVM, etc.

Data Science Internship, Aivariant | Sep 2023 - Nov 2023

- Built ML models and applied various validation techniques.
