

RAKESH KUMAR K

3/17,5th Street, Kottaimedu, Vittilapuram (post), Kalpakkam (via), Chengalpattu-603102, Tamil Nadu, India.
Email: rakesh72847@gmail.com. **Phone: (M)** +91 9688514250

Young, energetic, and highly motivated and hard-working Submarine NOC-Transmission Engineer and Telecom testing with 8 years of experience; proficiency in Submarine Cable Technology, Transmission, Fiber Optics, SDH, DWDM & Ethernet networks, OTN, Network management systems, protection mechanisms, fault management, alarm monitoring and expertise in incident management and change management.

Academic Background

- **B.E (E.C.E)** from Chendu College of Engineering and Technology, Anna University (2013-2017) with an aggregate of 60%

Technical Tools/Equipment Handling

Network Management tools: Alcatel 1353NM, 1354RM, SN, TYCO TEMS, CIENA One Control, CIENA6500 Site Manager, Ciena 5430 Node manager, Junos Space, EIG-CygNetNSS Java Client tool, NOKIA-WSNOC, JIRA.

Testing tools: OSA, OTDR, COTDR, Optical Power Meter, Optical Source Meter, Variable Attenuator, Clamp Meter, Sunset 10G tester, JDSU MTS-5800 (10G Tester), JDSU MTS- 8000(OSA+OTDR), JDSU MTS 100G Tester, Anritsu 10G Tester and Fiber scope.

Equipment Handling: Alcatel 1678, 1620, 1626, ASN PFE, TYCO SLTE (GEN-1, GEN-2 & GEN-3) PFE, CIENA 5430, 6500 and 5160(Switch), Coriant, Juniper routers (JMX480, JMX960 Series), Cisco Switches (C2960, C3560, C3750, C4500, C4900, C6500 series), Nokia (1830 PSI-CL, PSS, PSI-M, OLS-Simulators)

Hands on experience: SDH, DWDM, Submarine cable system and OTN, QA Manual Testing.

Professional Background

Currently working as Senior Project Engineer at Wipro Technologies, Chennai since 15 September 2022 till date.

Roles and Responsibilities:

- Have a good knowledge of telecom software testing (QA)
- Review and analyze software requirement requirements/Specifications.
- Supported for Nokia NNA, PMNextGen and T-API project for releases 22.12 to 25.12.
- Testing the health performance of network like Live PM, On-Demand, Schedule a Report, Manage schedule & System Preference Screens on WSNOC.
- Interacting with clients/developers to understand the software requirements.
- Testing the different type of connection management and node management operations on WSNOC.
- Creating VM(RHEL an centos) & installing NFM-T with HA, Standalone and distributed setup.
- Design and modify the test strategy and testcases based on the software requirements.
- Having a good knowledge on API testing using Swagger and Postman tool.
- Having a good knowledge of bug reports.
- Supported Epic testing and giving demo to customer at end of release.
- Preparing & executing test case for all assigned user stories within a sprint.
- Timely completed 1st & 2nd pass for all Epics.

Former Experience - I:

Designation: Senior Specialist (From May 2022 to September 2022)

Projects Handled: Microsoft (Azure Optical Long-haul NOC)

Client: HCL Technologies Limited, Hyderabad

Technology: DWDM, Ethernet.

Roles and Responsibilities:

1. Maintenance: - Owned Network and Leased waves

- Create VSOs for scheduled maintenance window, include MOPs and roll back plans when necessary.
- Capture pre-maintenance alarms and compare post –maintenance.
- Verify Traffic Restoration with appropriate property groups.
- Verify Pre-post optical span loss, field support can't be released until post levels are acceptable.
- Perform SW (Software) upgrades.

2. Break-Fix: - Owned Network and leased waves

- Determine impacted environment, datacenters, VMs, services.
- Triage Severity with impacted property groups
- Troubleshooting & resolution for link flaps, fiber cuts, power level differences and link down status
- Cost out traffic during fiber cuts.
- Coordinate spares replacement with MSFT site services and/or RMA with optical equipment suppliers

3. Modus Operational:

- Coordinate dispatch-to include DCATs, Site access IDs and escort alignment with fiber providers and equipment vendors.
- Drive network changes
- Run ROC simulation jobs.

Former Experience - II:

Designation: NOC Engineer (From January 2019 to April 2022)

Projects Handled: Europe India Gateway (EIG Submarine Cable System)

Client: Nextra data Limited, Chennai.

Technology: DWDM, OTN, Ethernet.

Roles and Responsibilities:

1. Network Administration: - Service Delivery

- Capacity utilization: Planning, circuit provisioning, end-end stability test within target-timelines which includes co-ordination with other station teams/customers.
- Restoration: Restoring services through other cable systems during planned/unplanned outages.
- Planned Outage Management: Carrying out planned activity and activation requests, ensuring that all the service KPI's are achieved.
- Work orders processing with in the RFS and end to end database building with help of Cygnet java Client tool.

2. Network Operations: - Service Assurance

- Alarm management- Standard Alarm Monitoring to report, localize and resolve any fault or abnormal condition in Network and handling customer complaints.
- Provisioning the circuit based on customer Requirement and Coordinating with Terminal station for pre-service testing of link with Rate (STM 1, STM 16, STM 64, and 10 G).
- Planning & Configuration of circuits over SDH / DWDM Networks, based on customer requirement within target-timelines.
- Planning and coordinating with station staff for Network Migration, Optimization, Segment commissioning and acceptance testing implementation.
- Wet Plant Maintenance- PFE, SLTE, PM and Repeater interrogation report preparation and analysis.
- DCN/ADCN link and router health maintenance.
- Marine fault- analysis, coordinating marine repair operation, carrying out post repair test and analysis, which includes co-ordination with cable ships.
- Spare Inventory Maintenance & Repair Process- Coordinating with vendor and shipping agent for shipment of faulty items through R&R process. Calibrating the test equipments by sending to supplier whenever required.
- Trouble Ticket handling with customer and suppliers. Resolving critical complaint / non-critical complaint, faults and coordinating with vendors' technical support teams with maintaining the SLA.
- Monthly and quarterly preparation of Outage and Fault Analysis and Faulty board preparation Reports.
- Hands on experience in MSP 1+1 Linear, MSP 1:1, and MSP 1: N Working/Switching.
- Taking periodic backups from Alcatel 1353 NM, 1354 RM and Tyco TEMS-NMS
- Coordinating with Technical support teams (Alcatel and Tyco – Level 1 support) whenever necessary.
- Managing the Co-ordination with station and Supplier personnel during installation, commissioning, and Software upgrades.
- Coordinated with multi-clients like AT&T, BT, Vodafone, Verizon, GibTelecom, MTN, PT, STC, Telecom Egypt, Submarine Cab, OmanTel, Telkom, Djibouti Telecom, Sify, etc.

Former Experience - III:

Designation: Telecom and networking Trainee (ITMC- Apprentice Trainee) and Cable landing station operations & maintenance Engineer (TIC-Associate) (From January 2018 to December 2018)

Projects Handled: Tata Indicom India-Singapore Cable System (TIC-Submarine Cable network)

Client: Tata Communication Limited, Chennai.

Technology: DWDM, Ethernet.

Roles and Responsibilities:

- Maintaining entire submarine cable operations (TIC) & monitoring Power Feeding Equipment (PFE).
- Installation, commissioning, integration, circuit provisioning, Operations & Maintenance.
- Coordinate with remote cable station person in case of equipment related faults and faulty card replacement.
- Hands on experience in CIENA 6500 provisioning and upgradation (100G,400G & 40G cards) and installation, commissioning, Circuit provisioning in Ciena 6500 equipment.
- Coordination with GNOC, RCO, NMC Wall, TATA ITMC (International Transmission Maintenance Center) and other CLS (TIC Singapore & Bharti-i2i) for network fault troubleshooting.
- Taking periodic (Monthly and Quarterly) backups from Tyco TEMS-NMS, Ciena Site manager.
- Routine management for RI, PM and DCN/ADCN Checks and
- Experience in handling SDH, DWDM Trans receiver cards (Tyco).
- Experience in Tickets Handling.
- Daily routine checks for all SDH, DWDM equipment's and Alarm monitoring & troubleshooting faults through NMS system.

- Coordinating with vendor Tech Support (Tyco) for any failure of equipment (PFE).
- Preventive inspections of Landing station to Beach Manhole to Land routes.
- Preventive checking of PFE battery bank and keeping track of spares, inventory management and routine maintenance.
- Monitoring and clearing alarms of TEJAS, ECI XDM, and CIENA coordinating with NOC team.
- Monitoring and clearing alarms in the OFC network with NMS.
- Hands on experience in physical connectivity between the Mux to Mux & Mux to router and switch by using optical fibers via inter floor.

Awards and Achievements

- Appreciation from EIG Management for restoring the 500G traffic during the failure in a minimum time.
- Appreciation from EIG Management for Involvement in EIG Seg 2.3 Marine Ops 8, EIG UG#4 activities
- Appreciation from EIG Management for BCP involvement during the COVID-19 pandemic.

Personal Details

- Nationality : Indian
- Languages Known : Tamil, English.

Declaration

I hereby declare that the details and information given above are complete and true to the best of my knowledge.

Place: Chennai

Sincerely,

Date:
