

Aditya Priyadarshi

Senior Software Engineer

PROFILE SUMMARY

Total 8+ years of experience in telecom network operator/NOC/O&M/service delivery.knowledge of Python/Git/Docker/terminal/Postman API. Working on Blue planet orchestration and inventory. Ciena Blue planet orchestration for Resources adapter development(Python,devOps). Hands-on different devices like Ciena 6500/wave server AI,infirera hiT7300/Groove G30,Nokia OLT/ONT,Cisco,Acceden GX/LTS/GT, huawei,HFCL, Juniper etc. excellent skill to provide technical support needed by the customer to resolve the various devices related issues. Worked in NOC, Troubleshooting skill, Worked on NMS/EMS. Knowledge on optical fibre, satellite, Ethernet.Technology uses DWDM/SDH/OTN/2G. Structured Resource adaptor for different Customers.

EDUCATION

2015

B.Tech/B.E.

Uttar Pradesh Technical University
(UPTU)

WORK EXPERIENCE

Jun 2024 -
Present

Senior Software Engineer
Tech Mahindra

working on BT project start from the scratch. Developing MDSO. Working on BPMN camunda workflow, Service template level changes. using git. developing the code. planning etc.

Aug 2023 - Jun
2024

Software Development Consultant
Liquid intelligence technology

Liquid Intelligence Technology (Pune) - Current Position Senior Consultant - SDN Project Ciena Blue Planet BPO, BPI for South Africa region Currently serving as a Senior Consultant, actively involved in operation support for the Ciena Blue Planet Orchestrate/Inventory, ROA (Resource Orchestration Automation), and UAA (User Authorization and Authentication) project. Engaged in the development and refinement of Resource Adapters (RAs) tailored to Liquid Telecom's network infrastructure, ensuring seamless integration with Cisco and Juniper devices. Collaborating closely with cross-functional teams, utilizing Ciena Blue Planet's features for efficient network automation, provisioning, and inventory management. Providing operational support for Blue Planet Orchestration platform functionalities, including Orchestrate, Inventory, ROA, and UAA, contributing to improved network agility and service delivery. Proficient in utilizing Ciena's Blue Planet Orchestration platform for developing Resource Adapters (RAs), contributing to efficient network automation and orchestration. Skilled in designing, implementing, and enhancing RAs tailored to specific client requirements, ensuring seamless integration with diverse network devices and protocols. Experienced in developing RAs from scratch. Capable of modeling and developing RAs for a wide range of network devices, including Cisco IOS/XR/XE, Juniper MX/EX/PTX Nokia ISAM 7360 OLT/ONT among others. Proficient in leveraging Python development skills to create

structured and scalable microservices for fetching and parsing networking device data, enhancing automation capabilities within the Blue Planet ecosystem. Collaborated effectively with cross-functional teams, including networking, testing, and client stakeholders, to gather requirements, ensure feasibility, and deliver high-quality solutions. Demonstrated expertise in utilizing Blue Planet's features for discovery, provisioning, and orchestration of network resources, contributing to improved operational efficiency and service delivery. Accustomed to working with JIRA ticketing system for tracking enhancement requests, bug fixes, and project progress, ensuring timely resolution of issues and alignment with client expectations. Experienced in working with multiple RAs concurrently, managing bug fixes with a prompt average response time of 1.5 days, and maintaining a high standard of service delivery. Demonstrated strong communication skills in liaising with global teams, clients, and stakeholders to understand requirements, address concerns, and drive collaborative problem-solving efforts. Contributed to the continuous improvement of Blue Planet Orchestration platform capabilities through active participation in feature enhancements, testing, and feedback sessions.

Mar 2022 - Aug 2023

Senior Software Development Engineer
Brillio

Senior engineer at brillio Project- Ciena Blue planet Orchestrate Resource adaptor development, We are developing RA from scratch.We are testing APIs(Rest/CLI) from Postman & starting doing domain creation then adding product. we are generating Kafka files, once unit testing done we deployed code on the server. Basically we are structuring the entire network of multiple clients like- NEOS, Frontier, Shentel,CABLEONE, Virgin Media,DT, Vocus,Cox,Teleponica-Chile,GPC,Rogers.

Oct 2021 - Mar 2022

Senior engineer- service delivery
Colt Technology Services

Part of team - SERVICE DELIVERY (SD)- Field Service Activation & Testing • Coordinated with different functions such as customer services, installation team, and customer-site planning team, node team, NOC, etc. to ensure that services were delivered first time right Europe and elsewhere. • Layer-2 Installation in all GR country. • Troubleshooting with OLO (other lease operator) to provide service within SLA. • Designing network planning & implementation of Carrier Ethernet Services like P2P, Hub & Spoke and EPN services over fiber and SDH (Bandwidth ranging from 2Mbps to 100 Gbps) between different nodes in COLT network ensuring no & managing different range of telecom network equipment's remotely for configuration changes, maintenance and troubleshooting network problems and conflicts. • Actively involved in engineering tasks such as network expansion and new network Cut-In. • Performing recovery and migration projects (re-planning & re-routing) of the customer circuits. • Provisioning of 1G and 10G International circuits on Accedian device. • Testing of newly provisioned Access/MMSP (national or International) services in coordination with country technicians by providing them technical assistance and scrutinizing service end-to-end. • Managing the different devices (Accedian) remotely by using NMS. • Testing of customer services end to end or remotely by using Y.1564, RFC2544. • Ensuring the SLA with OLO line providing by different providers. • Fault diagnosis/analysis and service migration in case of multiple failure. • Traffic Shifting/Up-gradation for network capacity optimization

Oct 2019 - Oct 2021

Amazon data center OTN DWDM Ciena Coriant Project, NW Transmission Engineer,CCNA certified by CISCO
Tata Communications Transformation Services
-Link Optimization & Link management Of Amazon Live BOM

network. -Dealing with Amazon Client. -Fault Detection & handling all ISP level Troubleshooting part(Coriant hiT7300 Groove) (Ciena 6500 & wave server AI) HuaWei & Coriant Equipment). -Card addition, deletion & configuration of Coriant cards in network. -Frequency retuning, frequency migration & WDM trail creation. -CP/ASON in Ciena network & Coriant network -Network alarm monitoring, debugging the malfunctioning and misbehavior of equipment and enabling Daily Operation & Maintenance Activities to ensure that all Related Alarms are Effectively Cleared with minimum Outages. - Docket Handling, Fault finding, rerouting the circuit, Rectifying & Restoring the circuit in Minimum down time in coordinating with field team. - Handling traffic outage of DWDM equipment at Network Operation Center in co-ordination with field engineers & re-routing the traffic in Major network events. -Online support to Field engineers for Execution of Work Orders issued for new circuits & Maintaining daily alarms and fault report in LOG book. Also report all Infra / power related issue and maintain same in datasheet for rectification. -Round the clock online technical Support to field Team for equipment malfunctioning issues & Monitoring of Network during Planned Events. -Generating outage and network availability reports on daily, weekly basis which include reports of daily.

Jul 2019 - Sep 2019

NOC Engineer

Pratap Technocrats Pvt Ltd

-Generating outage and network availability reports on daily, weekly basis which include reports of daily. -O & M activities, Power level activities report & fluctuation activities report. - Escalation of the problems through an escalation matrix & ticket opening with Huawei TAC. - Responsible for handling major network incidences and Monitoring all DWDM Network, According to VSNL SLA (Service Level Agreement) Within Target Timelines. -Monitoring of Network during Planned Events in coordinating with Fiber team. -Link Uploading in NMS (T2000) and developing Cross- Connections. -Enable Daily up gradation in Network Management Systems. -Versions up gradation, software patch installations in NMS & in equipment whenever required. -Alarms Observation of fiber losses and infra alarms of Huawei DWDM on NMS U2000. -Initiate service requests for fiber cuts and escalate to relative circles and operators. -Find power levels and loses of fiber links to check current degradation and improvements. -Fiber network observation to identify critical, isolate and unmanaged nodes to rectify accordingly. -Manage planned activities by coordinating with circles. -Currently Experience of working with Tejas EMS and Huawei U2000 NMS. -Tejas ME-100 and TJ-1500 mux and Huawei OSN 2500 and 3500 Mux, 550 MUX. -Perform CRs like cross connection modification, board insertion, MSP modifications. -Use network tools to monitor core network and customer services. -Perform diagnostics on all Transmission network and customer faults. -Generate action plans to troubleshoot all Transmission network and customer faults. - Track the incident management of proactive and reactive issues through the Trouble Ticket system. -Management and Technical escalation of Trouble Tickets in line with process. -Raise TT in SDM Tool and take follow-up till closer. - Coordinate NOC activities with local Field Operations and Vendor/Supplier representatives to -Diagnose and fix faults across a pan-European network. -Liaise with customer representatives to progress fault resolution. -Support local Field operations with maintenance activities. -Works in the NOC on a 24x7 shift rotation.

May 2016 - Jul 2019

SSA JE Engineer

SI IPL

Operation, Integration and Maintenance Service(O & I),Rici converter installation & configuration,E1 punching, bypassing,vlan tagging, VSAT link alignment (iUAT running)

troubleshoot, microwave link alignment,site survey, E1 testing lan cable testing,R2 type IP base BTS configuration, customer complaints attend

Projects

518 Days

Resource adaptor development for Ciena

Project- Ciena Blue planet Orchestrate Resource adaptor development, We are developing RA from scratch.We are testing APIs(Rest/CLI) from Postman & starting doing domain creation then adding product. we are generating Kafka files, once unit testing done we deployed code on the server. Basically we are structuring the entire network of multiple clients like- NEOS, Frontier, Shentel,CABLEONE, Virgin Media,DT, Vocus,Cox,Teleponica-Chile,GPC,Rogers.

153 Days

Voda Idea Optical Fiber Project

maintaining & fault management Voda idea optical fiber via DWDM nsn tool

1156 Days

BSNL LWE PROJECT

The project was undertaken by Vihaan Networks Ltd (VNL) and Bharat Sanchar Nigam (BSNL) to set up the worlds largest solar-powered green mobile network in LWE-affected regions. The project was implemented using indigenously designed and manufactured technology in a record time of less than 18 months and is now operating and managing it for a period of five years.

COURSES & CERTIFICATIONS

- CCNA 200-301 Switching and routing (Valid upto January 2024)
- Python Basics
- Internet of things (IoT) Training & Certification Courses
- CIENA BP- Networking
