

RESUME

M.SENTHIL

E.MAIL : senthiltxn@gmail.com

Mobile : +91- 8660649885

SYNOPSIS

- Hands On Experience in DWDM, OTN and SDH services creating, migration and testing.
- A competent professional offering 10 Years of overall working Experience in Optical Networking, OTNM Tool 2000, Optical-Fiber Communication, IP Planning and Topology of Network, Operation & Maintenance, Customer-end management.
- Hands on experience with NMS/EMS (Nokia) on optical DWDM multiplexers (Huawei) and OTN multiplexers (Fiberhome, Cisco).
- Proficiency in Optical networking and Telecom wire-line technology DWDM and OTN.
- Proficient in Network essentials Ethernet, LAN and WAN technologies.

Professional Experience:

I am currently working with Capgemini Engineering Limited. As a Cisco R&D Project (OCT 2022 to till date)

Responsibilities:

- Various feature validation testing handled for Cisco NCS1004 and NCS1014 product.
- Testing with Muxponder and Transponder of OTN (NCS1004 and NCS1014).
- Network solution testing for pre and post feature projects (OTN/DWDM).
- Worked on lab environment and prepared various network setups to validate different network scenarios.
- New feature testing and demonstration to the customers for presales project support.
- Document preparation for various network solutions and features.
- Supported for various new feature implementation into the live network.
- Worked as technical support engineer for OTN/DWDM
- Handled OTN EMS and supported for deployments and provisioning from the NOC.
- Various network setup testing for OTN and DWDM network
- Mentoring to the automation team to understand the features to automate.
- Test plan preparation, testcase execution and documentation for the new features
- E2E validation for Network analytics tool and its features

Working Device and Tools:

NCS1004 - Bosshogg device (Supported with 400Gig)

NCS1014 - Kepler device (Supported with 800Gig)

Monitoring and de-bugging: CLI (VNC tool)

Worked with Infinite computer solutions Private Limited. As a Nokia R&D Project (2021 Dec to – OCT 2022)

- ✓ NMS/EMS Management project
- ✓ L2 card Provisioning
- ✓ Service Design and Provisioning.
- ✓ Network Design and Data filling of Data products based on the customer requirement.
- ✓ Network Migration and Change Management task based on requirements.
- ✓ Different types of protection (ERP, LAG and MC-LAG)

Especially working as testing the L2 cards and migrating the services for Nokia devices.

Working Devices:

- PSS-32,PSS-16II,PSS-24x,PSS-8,PSS-4

Technical Summary:

Technologies : SDH and OTN
Configuration Tool : Mobaxterm, Putty
Monitoring Tools : v1830
Debugging Tools : NFMT and EQM

Key Responsibilities:

- Troubleshooting, tracking, and resolution of day-to-day network & Service issues.
- Good understanding of Configuration of ERP, LAG, MC-LAG, and MPLS –TP.
- Different Types of L2 service configuration such as E-LINE, E-TREE, E-LAN.
- Different types of configurations are done on ERP like Shared ERP, and Transparent ERP for protection.
- Configuration for Point-to-point service at EPL and EVPL.
- Configuration for Point to Multi point service for EPLAN and EVPLAN
- Configuration for Symmetric and Asymmetric service for EPTREE and EVPTREE
- Configure the Channel and Protection for NPA and Tunnel creation at MPLS-TP,
- For Loopback purpose configure the control service like SAP and VPLS
- For monitoring purpose doing the configure for MD, MA, MEP and RMEP
- For the functional testing we are configuring the DB delete and deploy for service deleting and recreating
- For service modification we are configure Move back to allocation and Modify option.
- Different Types of L2 Cards testing like Uplink, Legacy, Side winder and Packet cards.

Worked with Talent pull Infrastructure Private Limited as a HFCL Project (2020 Dec – 2021 Nov)

For : Air force, Navy and Defense
Role : Sr. NOC Engineer-Optical projects, NOC Lead

Technical Summary:

Technologies : DWDM and OTN
Testing Tools : OSA, Ethernet Testers.

Monitoring Tools : EMS 1600
Debugging Tools : Telnet, Putty.

NOC - Responsibilities:

- **Maintaining the Defense Ring and Mesh Network of 6500 & 0072.**
 1. OAM support 24/7 and notification along with fault management.
 2. Providing on technical support (hardware and software) to engineers on Cleana 5400&6500.
 3. Configure the REG for 3R.
 4. Create the Wavelength as per customer requirements.
 5. Configure the ROADM for Mesh Operation.
 6. Changing the IP address of Terminal and OLA by remotely.
 7. Commissioning and Acceptance testing of Terminal and OLA.
 8. New NE Creation, Configuration of various features (Sync source/ circuit provisioning / cross connections, Protection with EMS).
 9. Solving the field problems regarding Commissioning and monitoring the OFC Network.
 10. Providing Technical support on STM-1 to 100G.
- **Service and Performance:**
 1. Service created as per customer requirement like ODU0 to ODU4
 2. Protection to be provided like SNCP 1+1.
 3. Checking Service performance.
 4. Checking with Line card and client card performance.
 5. Checking with Link and terminal.
- **For maintenance Performance.**
 1. Monitoring End to End troubleshooting of Service and equipment.
 2. Service delivery and performance reviews with our esteemed customers.
 3. Coordinate with Client Planning Teams/ Installation Engineers /Central team for project implementation.
 4. According to FC (Fiber Characterization) report designing customer network
 5. Check the performance of Line, Client, and management with supervisory card.
 6. Power level monitoring of Amplifier cards (OA & PA).
 7. Check the performance and power level of MUX / DMUX card.
- **Individuals Performance.**
 1. Support to Customer for all technical issues
 2. Prepare the Daily activity report, Weekly and Monthly reports.
 3. Designing of High-level documents for project implementation.
 4. Prepare the Mesh and Ring Circuit details.
 5. Prepare the SPAN loss sheet for Amplifier cards power level.
 6. Every 2 hours intimate to the customer of Fiber cut & restore.

Worked with Edge Telecom Private Limited as a FiberHome Technologies (2016 – 2020)

For : Bharat Sanchar Nigam Ltd (B.S.N.L)
Role : Lead Engineer-Optical projects, NOC Lead & TAC - Engineer

Technical Summary:

Technologies : DWDM, OTN & ASON.

Testing Tools : OSA, Ethernet Testers.
Monitoring Tools : EMS (Fiber home - OTNM2000)
Debugging Tools : Fiber home - Telnet, Putty.

NOC - Responsibilities:

- **Maintaining the BSNL OTN Mesh Network of FiberHome U2000.**
 1. 24x7x365 Support, notification and fault management.
 2. Providing on technical support (hardware and software) to engineers on FONTS 5000 product.
 3. Configured L3 VPN DCN Media for service.
 4. Configure the TUNNEL, Static IP, and OSPF for the Terminal.
 5. Create the Wavelength (CE39 & CE40) as per customer requirements.
 6. For using the WSS8M for Lamda alignment & shifting
 7. Terminal Node and OLA creation are used for DEVCFG tools.
 8. Changing the IP address of Terminal and OLA by remotely.
 9. Commissioning and Acceptance testing of Terminal and OLA (FONTS 5000).
 10. Link (OA to PA) creation for WDM to OLA and OLA to OLA for checking the route.
 11. New NE Configuration of various features (circuit provisioning / cross connections, Protection)
 12. Solving the field problems regarding Commissioning and monitoring the OFC Network.
- **Create the Channel & Service (STM -1 to 100G) of OTN & ASON.**
 1. Create the OCH channel for path creation between 2 terminal Nodes.
 2. Create the ODUk (Data unit) path for protect the service
 3. Create the PDU for where we can set the port and service type and details.
 4. Create the OCH (SNCP 1+1) ring protection.
 5. Create the protect for ODUk like (Dynamic & 1+1 Train protect).
 6. Single NE Cross (STM-1, 1GE, STM-16 & STM-64) connection creating for Link test.
 7. Create PC and SPC Service for OTN (STM-1 to 100G).
 8. Create with GOLD (1+1 train protect) and Diamond protection for ASON.
- **Upgrade the Main card / Line card / Interface card for U2000.**
 1. Main card (CCU) upgrades for new software version.
 2. Management (EMU & EFCU) cards improved.
 3. Supervisory (OSCAD & EOSC) card upgraded.
 4. Line (1LN4) card upgraded.
 5. Interface (16TN1, 12TN2 & 1TN4) card upgraded.
- **For maintenance Performance.**
 1. Monitoring Maintenance and End to End troubleshooting of OTN & ASON circuits given to customers.
 2. Service delivery and performance reviews with our esteemed customers.
 3. Coordinate with Client Planning Teams/ Installation Engineers /Central team for project implementation.
 4. According to FC (Fiber Characterization) report designing customer network
 5. Check the performance of Line, Client, and management with supervisory card.
 6. Power level monitoring of Amplifier cards (OA & PA).
 7. Check the performance and power level of MUX / DMUX card.
 8. Check the performance of Direction card (WSS8M & ODU8).
 9. Check the power level of Service card (16TN1, 12TN2, 1TN4).
- **Individuals Performance.**
 1. Support to Customer for all technical issues

2. Prepare the Daily activity report, Weekly and Monthly reports.
3. Designing of High-level documents for project implementation.
4. Prepare the ASON & OTN Circuit details.
5. Prepare the SPAN loss sheet for Amplifier cards power level.
6. Every 2 hours intimate to the customers of Fiber cut & Restore details.

Worked with IKYA Human Capital Solutions Ltd As a Huawei Telecommunications (2014 - 2016)

For : Bharat Sanchar Nigam Ltd (B.S.N.L)
 Role : NOC - Engineer

NOC - Responsibilities:

- Maintaining the BSNL OTN Mesh Network of Huawei OSN 9500/7500.
- Configured the L2VPN DCN media for service.
- Maintaining the client made windows 2003 server.
- Create the SPC Service STM 16 to 10G Level.
- Using the U2000LCT for Commissioning the PTN equipment.
- Using the U200 for SDH network for NMS Software.

Transmission - Major responsibilities:

- Involved in QA testing as per customer requirements.
- EMS Worked on OptiX manager T2000 NMS for Transmission Network
- Involved in Installation, testing and commissioning of the equipment according to TSEC and ITU-T standards
- Configuration, Fault, Application, Performance, Security Management (FCAPS) Testing with LCT & EMS.
- Solving the field problems regarding Commissioning and monitoring the OFC Network
- Given training classes on OptiX BWS 1600G for BSNL people
- Providing Technical support on STM-1.

Projects Summary:

#1Project Name : HUAWEI Optics for 40 Channels (10G) DWDM
 #2Project Name : HUAWEI OptiX OSN 7500 (DXC)
 #3Project Name : HUAWEI OptiX OSN 9500 (DXC)

ACADEMIC CREDENTIALS:

- B.Tech in Electronics & Telecommunications from St, Josephs Engineering (Deemed) College
- Diploma in IRT Polytechnic College
- SSLC from State board

DECLARATION:

I consider myself familiar with DWDM and OTN Aspects. I am also confident of my ability to work in a team. I hereby declare that the information furnished above is true to the best of my knowledge.

(M. SENTHIL)
