Thane, Maharashtra | +91 9321682681 | yadav1980ankit@gmail.com | LinkedIn

Professional Summary

Electronics and Telecommunication Engineering Graduate Fresher with foundational knowledge of Desktop Support, Basic Networking, DWDM, OTN Hardware Troubleshooting and LAN Support. Looking for an opportunity to begin my career and contribute to organizational success while continuously learning new technologies.

EDUCATION

Lokmanya Tilak College of Engineering

Koparkhairane, Navi Mumbai

Bachelor of Engineering in Electronics and Telecommunication

2022 - 2026

CGPA: 6.98

SKILLS

- **Networking:** TCP/IP, OSI Model, IPv4/IPv6, LAN/WAN, Network Protocols
- **Optical Networking:** DWDM (Dense Wavelength Division Multiplexing), OTN (Optical Transport Network)
- **Ciena Platforms:** Ciena 6500, Ciena 5430
- **Remote Support:** AnyDesk, Remote Desktop
- **Networking Tools:** Basic Network Configuration, Troubleshooting, Ping, Traceroute
- **Others:** Quick Learner, Problem Solving, Team Player, Positive Attitude

UNIVERSITY PROJECTS

MindMate – AI Mental Health Companion

- Agentic AI using n8n, GPT-4o & Twilio; handles mood check-ins, journaling prompts & breathing exercises.
- Published research paper in IRE journal documenting system architecture and mental health impact analysis.
- Use cases: corporate employee wellness, teletherapy platforms, mental health triage in healthcare systems.

Smart Kitchen Hygiene Monitoring System

- Developed a Python and OpenCV-based hygiene monitoring system for real-time cleanliness detection.
- Built a machine learning model to classify clean/unclean conditions using computer vision.
- Integrated IoT sensors (gas, temperature, and air quality) for real-time smart kitchen safety monitoring.

EchoMeter – Ultrasonic Distance Measurement System

- HC-SR04 + Arduino Uno; measures real-time object distance via Time-of-Flight, displayed on 16x2 LCD.
- Converts echo pulse durations to cm/inch using speed of sound calculations.
- Use cases: warehouse automation, vehicle blind-spot detection, conveyor belt sensing.

ACTIVITIES

Smart India Hackathon 2025

Koparkhairane, Navi Mumbai

- Built an agentic AI voicebot for farmers delivering scientific crop-growth suggestions in regional languages.
- Ranked Top 5 at institution level; solution addressed real-world agricultural productivity using conversational AI.

IETE – Institution of Electronics & Telecommunication Engineers

Koparkhairane, Navi Mumbai

Committee Member

Jul 2024 – Apr 2026

- Assisted in conduction of 5+ technical workshops on telecom & networks related topics.
- Engaged in practical sessions bridging academic knowledge with real-world electronics and communication applications.
