PROFILE SUMMARY

I'm a B.Tech Computer Science graduate with strong hands-on experience in network infrastructure, routing, switching, firewall configuration, and network security. Completed the Cisco Networking Academy internship with practical exposure to enterprise network design, packet analysis, and protocol troubleshooting. Certified in CNSP (Network Security Practitioner) and Certified Security Operations Professional, actively preparing for CCNA. Proficient in TCP/IP, VLANs, subnetting, NAT, DHCP, DNS, pfSense, and Wireshark. Built real-world network tools using Python and deployed cloud infrastructure on GCP and Azure. A detail-oriented and proactive network professional ready to contribute to network operations and infrastructure support.

TECHNICAL SKILLS

- **Networking:** TCP/IP, OSI Model, VLANs & Inter-VLAN Routing, Switching, STP, DHCP, DNS, NAT, Subnetting.
- **Network Security:** pfSense Firewall, Access Control Policies, VAPT basics, Log Analysis, Threat Identification
- **Tools & Monitoring:** Wireshark, Nmap, Shodan API, Cisco Packet Tracer, Network Diagnostics & Troubleshooting
- **Scripting & Automation:** Python, Bash, Linux CLI, Windows
- **Documentation:** Reports, Incident Documentation, Troubleshooting Logs, MIS Reporting

PROFESSIONAL EXPERIENCE

Network Engineer Intern – Cisco Networking Academy

Jun – Aug 2024

- Designed and simulated enterprise-level network topologies using Cisco Packet Tracer, configured VLANs, Inter-VLAN routing, DHCP, static routing, and subnetting across multi-switch environments.
- Gained direct exposure to Cisco networking technologies and best practices for enterprise infrastructure design.

VAPT Intern – Shadow Defense

Dec 2024 – Jan 2025

- Conducted network security assessments, scanned infrastructure, identified open ports, misconfigurations, and vulnerabilities across network devices and firewalls.
- Analysed large network log files to identify anomalous traffic patterns, suspicious activity, and potential indicators of compromise.
- Documented findings in structured security reports with risk ratings and remediation recommendations.

Digital Forensics & Security Intern – Cyber Secured India

Mar – May 2024

- Monitored and analysed system and network logs to detect anomalies, suspicious activity, and security events.
- Gained exposure to incident analysis workflows and network security monitoring best practices.

Smart City Intern – IT & Networking – Municipal Corporation Indore (MIC)

Dec 2025 – Jan 2026

- Implemented a CI/CD pipeline using GitHub Actions, automating deployment workflows and improving infrastructure reliability.

KEY PROJECTS

- **Net Analyzer – Python Network Scanner with Shodan API** Built a Python tool that scans IP ranges, identifies active hosts and open ports, and integrates the Shodan API for real-time vulnerability and exposure data. Automates network reconnaissance and infrastructure visibility - directly applicable to NOC and network operations workflows.
- **Campus Network Architecture – Cisco Packet Tracer** Designed a full multi-department enterprise network topology with VLANs, Inter-VLAN routing, DHCP, DNS, subnetting, and ACLs. Simulated real-world Cisco infrastructure demonstrating strong network design and segmentation skills.
- **Office Network Deployment** – Designed and managed to deploy a office Infrastructure network connecting to over more than 7+ computer and configuring router and setup firewall and made a internal file & printer sharing system for increasing efficiency.

CERTIFICATIONS

CNSP – Certified Network Security Practitioner (SecOps Group)

Certified Security Operations Professional – (Palo Alto Networks)

Cisco – Junior Cybersecurity Analyst, Cybersecurity Essentials

CCNA- Introduction to networks

EDUCATION

B.Tech in Computer Science (Cybersecurity) – IPS Academy, Indore

2022 – 2026

Relevant Coursework: Computer Networks, Network Security, Cybersecurity, Operating Systems, Database Management, Cloud Computing
