PROFILE SUMMARY

Azure Solution Architect with 18+ years of IT experience (9+ years in Azure & DevOps), specializing in designing, implementing, and optimizing scalable enterprise cloud infrastructures. Expert in Infrastructure as Code (Terraform), Azure DevOps, CI/CD pipelines, cloud security, and governance. Proven record of leading digital transformation, multi-region deployments, and cost optimization strategies ensuring resilience, compliance, and performance efficiency.

CORE EXPERTISE

- Azure Architecture & Governance • Infrastructure as Code (Terraform, Bicep) • CI/CD (Azure DevOps, GitHub Actions, ArgoCD)
- Azure Networking (VNet, VPN, NSG, Application Gateway) • Containerization (Docker, AKS)
- Monitoring & Observability (Azure Monitor, Log Analytics, Prometheus, Grafana)
- DevSecOps (SonarQube, Tfsec, Trivy, SAST, DAST) • Migration & Modernization • Cost Optimization & Azure Policy
- PowerShell and YAML Scripting

PROFESSIONAL EXPERIENCE

Azure & DevOps Architect | Inspirit Vision Pvt Ltd | Nov 2025 – Present

- Mentored DevOps and cloud engineers, conducted design reviews, and supported pre-sales and solutioning activities.
- Reviewed and optimized existing cloud architectures for scalability, reliability, and compliance.
- Guided teams on Azure security best practices, cost optimization strategies, and operational excellence.
- Acted as a technical advisor for DevOps transformation, including pipeline strategy, release governance, and security integration.
- Designed reusable Terraform module frameworks and CI/CD blueprints to accelerate client onboarding and deployments.
- Defined enterprise-grade Azure landing zones, governance models, and DevOps standards for new cloud adoptions.
- Led Azure and DevOps architecture engagements for multiple client projects, translating business requirements into cloud-native solutions.

Azure & DevOps Architect | Vodafone Idea Ltd | Oct 2022 – Nov 2025 |

- Designed and implemented scalable Azure infrastructures for business-critical applications.
- Automated provisioning using Terraform modules ensuring reusable, consistent, and secure deployments.
- Built end-to-end CI/CD pipelines with Azure DevOps integrating SonarQube, Trivy, and manual approvals.
- Collaborated with security and networking teams to enforce RBAC, NSG, and Azure Policy governance.
- Conducted cost audits and implemented tagging, budgets, and alerts to optimize Azure consumption.
- Championed Infrastructure as Code practices and Git branching strategies for enterprise automation.
- Supported hybrid connectivity design between on-premises and Azure VNets for high availability.

Azure Infra Automation Engineer | Reliance Jio | Jan 2019 – Oct 2022 |

- Designed and deployed Azure IaaS components (VMs, VNets, Load Balancers, Storage, NSGs, AAD).
- Migrated on-prem workloads to Azure using Azure Migrate and Recovery Services Vault.
- Deployed VPN Gateway and VNet Peering to enable secure multi-region communication.
- Integrated Azure Monitor, Log Analytics, and Grafana dashboards for proactive insights.
- Delivered governance through Azure RBAC and Policy ensuring compliance and identity control.
- Supported application modernization using AKS, Helm, and Terraform-based infrastructure templates.

Earlier Roles (2005 – 2019)

Major Incident Manager – Ericsson India Pvt Ltd | Incident Manager – Huawei India Pvt Ltd | Senior Network Engineer – Vodafone Spacotel Ltd | Network Project Engineer – Unitech Wireless | Transmission Engineer – Nokia Siemens | Transport Engineer – RISPL | Project Engineer – EIL

- Managed large-scale network infrastructure supporting telecom operations.
- Implemented network monitoring, RCA, and escalation frameworks following ITIL standards.
- Strengthened root-cause analysis and operational continuity through preventive design improvements.

KEY PROJECTS & ACHIEVEMENTS

• Workforce Management System on Azure

Architected a 3-tier application (React + Python + Azure SQL) hosted on Azure Virtual Machines with NGINX. Implemented CI/CD with Azure DevOps for automated build, deployment, and artifact management, achieving 70% faster release cycles.

• IoT Monitoring Platform with AKS

Developed a microservices-based IoT monitoring solution using AKS, integrated with Prometheus, Grafana, Loki, and Azure Monitor for real-time telemetry and alerting. Reduced downtime by 30% via proactive monitoring and self-healing scripts.

- **Azure Governance & Cost Optimization**

Implemented Azure Policies, Blueprints, and RBAC structures across environments, enforcing compliance and resource tagging. Reduced monthly spend by 25% through reserved instances, right-sizing, and automated cleanup scripts.

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (In Progress)
- AZ-104 Certified: Azure Administrator Associate
- AWS Certified Solutions Architect – Associate.
- ITIL® 4 Foundation Certified
- Cisco Certified Network Associate (CCNA)

EDUCATION

- MBA in Marketing – Manipal Jaipur University (Distance) (2023)
- B.Tech in Electronics & Telecommunication – VIET Bhopal(Distance) (2015)
- Diploma in Electronics Engineering – Govt Polytechnic Jhansi (2005)
