PROFESSIONAL SUMMARY

Backend Developer with **1.5+ years of experience** in building scalable applications, optimizing databases, and automating processes. Skilled in **Python, SQL, ClickHouse, MySQL, API development, and automation**. Strong experience in handling **large datasets (10M+ rows)**, optimizing queries. Adept at writing **efficient scripts for data processing, backend logic, and system automation**.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
 - **Messaging & Streaming:** Kafka
 - **Databases:** MySQL, ClickHouse (large-scale data handling)
 - **Data Processing:** Pandas, NumPy, large dataset optimization
 - **DevOps & Tools:** Linux, AWS (SES, S3), SendGrid, Git,
 - **Machine Learning:** Basic ML concepts
-

Backend Developer – Valueleaf (2023 – Present)

- **Optimized MySQL & ClickHouse queries**, improving performance for **large-scale data processing (10M+ rows)**.
- **Automated WhatsApp campaign alert emails**, integrating **SendGrid & AWS SES** for reliable email notifications.
- **Created a data ingestion pipeline** for processing high-volume data efficiently using **chunk-based querying (100K rows per batch)**.
- **Refactored legacy Python scripts**, improving maintainability and reducing execution time
- **Developed and optimized backend logic** for marketing campaign automation, ensuring faster and more accurate execution.
- **Integrated third-party APIs** for campaign analytics and reporting, ensuring seamless data synchronization.
- **Worked on cron jobs and automated scripts**, ensuring **timely execution of background tasks**.

Intern – Full-Stack Python Developer – Palle Technologies (2022 – 2023)

- Developed a **Student Management System** using **Django**, implementing **Admin Navbar** for improved UI.
 - Built a **Movie Management System** as a mini project using Django.
 - Gained experience in **full-stack development** with Django.
 - Learned **basic Machine Learning concepts** as part of the training.
-

PROJECTS

Large-Scale Data Processing with ClickHouse

- Built an optimized **data ingestion pipeline** for handling **10M+ records efficiently**.
- Used **chunk-based fetching (100K rows per query)** to improve performance.

WhatsApp Campaign Alert System

- Developed a monitoring script to detect **stuck files in tbl_whatsapp_logs**.
- Implemented **automated email alerts** based on launch ID, ensuring faster issue resolution.
- Integrated **AWS SES & SendGrid** for email delivery.

Student & Movie Management Systems (Django Projects)

- Built a **Student Management System** using Django with an **Admin Navbar for easy navigation**.
 - Developed a **Movie Management System** as a full-stack project.
 - Worked on **database handling and user interface improvements**.
-

EDUCATION

B.E. – Government Engineering College, Haveri (2023)

CERTIFICATIONS & TRAINING

- **Full-Stack Python Development** – Palle Technologies
-

EXTRAS

- Strong experience with **Linux, cron jobs, and debugging scripts running outside crontab**.
- Passionate about **backend architecture, API optimization, and automation**.
